INDEX

Current Reviews

From JOURNAL OF AMERICAN CONCRETE INSTITUTE V. 29, July 1957 to June 1958

A

Accelerated curing 83
Accelerators—Hardening 257
ACI Code—Discussion 429
Acoustic treatment—Concrete masonry 543
Adhesives—Epoxy-thiokol—Repair of spalled and cracked concrete 431
Admixtures
-Fly ash 431
-Polyvinyl acetate emulsion 174
Aggregates
-Coarse—Effect on mode of failure 1016
-Effect of coarse on mode of failure in compression and flexure 714
-Effect of heavy-media separation on durability of concrete 173
-Freeze-thaw durability 173
-Gradation by elutriation 432
-Lightweight—Sintering 79
-Lightweight (Terlite) 540
-Optimum granulometric composition—Effect on mix proportioning 257
-Preheating 710
-Reaction with cement—Studies 631
-Reactive—Undetected by ASTM tests 912
-Reactivity in concrete 713
-Sawdust—Insulating qualities 631
-Selection affects concrete quality 540
-Sintered fly ash—Used in block 540
-Sulfate content—Strength loss in samples cured 26-104 weeks 540
-Use of maximum size in mass concrete 714
Air content—Hardened concrete—Measuring device 179
Air-entrained concrete—Effect of de-icing salts 716
Air-entraining agents 183
Air entrainment
-Cement mortar 80
-Review 85
Airfield pavements
-Test of doweled joints 913
-Tests of heavy wheel loads 913
Air meter—Chace—Tests of 261
Air raid shelters—Specifications 87
Alkali-aggregate reaction
-Danish report 717
-Physiochemical studies 713
-Review 1151
Alkali reaction
-Inhibition of 83
-Use of pozzolans to control 1015
Allt-Na-Lairige Dam—Prestressed concrete—Design and construction 171
Alumina—Effect of mixing with cement 540
American Association of State Highway Officials specifications—Bridge design 709
American Civil Engineering Practice. Abbett. John Wiley & Sons, Inc. 263
Anchorage
-Prestressed concrete 182
-Railroad trackwork to concrete 439
Anchor bolts—Grouted in to secure cliff 632
Anisotropic shells—Analysis 172
Apartment house—Slip-form construction 72
Applied Strength of Materials. Jensen. McGraw-Hill Book Co. 544
Arch bridge—Fixed-end—Design and construction 169
Arch dams—Italian—Behavior observed 73
Arches
-Hinges in 437
-Loaded with torsional moment—Calculation 911
-Precast—Erecting 915
Architectural concrete—Exposed aggregate—Precast manufacture 630
Architecture
-Japanese techniques 253
-Religious buildings 439
Architecture as Space—How to Look at Architecture. Zevi. Horizon Press Inc. 438
Arch rib—Vertical load—Pressure line derivation 428
Atomic energy literature—Guide to 263
Autoclaving—Effect on physical characteristics of products 79
Avon Dam—Construction 72

B

Ball mill—Influence of powder charge on power requirements 920
-Investigation of surging 920
-Power requirements 920
Barges—Concrete—Bibliography 368
Barium cement—Investigation 628
Bars—Plain hooked versus deformed 262
Basic Reinforced Concrete Design—Elastic and Creep. Large. Ronald Press Co. 74
Baur-Leonhardt prestressing method 177
Beam grids—Influence areas 78
Beams
-Analogy between electric and elastic networks. 429
-Analysis by plastic theory 255
-Axial load test 181
-Bending stiffness—Theory and experiments 181
-Cracked—Effect of shrinkage and creep 77
-Curved—Expression for change of span 625
-Curved—Solution for plastic hinge with radial stress 911
-Deep—Solution by strain energy method 912
-Design problems in shear, diagonal tension and bond 910
-Flexibility—Interpretation 911
-Flexure—Analysis of vibrating systems 78
-Foam concrete—Diagonal shear reinforcing 86
-Helical—Symmetrical—Analysis 712
-Impulse testing—Instrumentation and method 918
-Light—Research 919
-Load deformations 428
-Loaded—Expected crack formation 77
-Long-time deformations—Study 263
-Nonuniform, vibrating—Calculation of receptances 911
-Post-tensioned—Stress concentration 179
-Post-tensioned but not grouted—Test 919
-Prestressed—Charts for preliminary design 625
-Prestressed—Deflection studies 83
-Prestressed—Endurance test 915
-Prestressed—Flexural resistance in elastic range 260
-Prestressed continuous — Ultimate bending strength 774
-Rigidity—Research 367
-Shear strength—Influence of plastic hinge 181
-Stress distribution where hole is present 426
-Triangular section—Design by degree of security theory 711
-Ultimate strength in shear 181
-Variable section—Temperature stress determination 1149
Bending strength of compression zone 87
Blast furnace slag cement—Test of concrete 912
Blast resistance
-Background information 543
-Shelter structures 439
Block
-Architectural uses 81
-Backup—Source of efflorescence 368
Bond
-Investigations in Sweden 717
-Steel to concrete—Tests 182
Bridge rails—Full scale collision tests 170
Bridges
-AASHO—Design specifications 709
-Bordeaux—Widening 623
-Cantilevered slabs—Bending moments 1013
-Ceylon—Prestressed 709
-Clifton—Prestressed construction 623
-Composite 624

-Composite—Design, construction, and field testing ... 170
-Design ... 425
-Drava river—Competitive design ... 1149
-Fixed-end arch—Design and construction ... 169
-Flat slab design ... 73
-Floating—Design and construction ... 425
-Grid frame design ... 73
-Hindan—Prestressed design and construction ... 623
-Langstone—Construction ... 537
-Modern—Planning in reinforced and prestressed concrete ... 253
-Prestressed—Construction ... 363, 537
-Prestressed—Cost compared with conventional ... 71
-Prestressed—Load factors ... 773
-Prestressed by Baur-Leonhardt method ... 177
-Prestressed decks under concentrated loads ... 178
-Prestressed girder—Construction ... 623
-Prestressed in place ... 71
-Prestressed, long span ... 260
-Prestressed, multi-beam—Field test ... 169
-Prestressed oblique slab—Design ... 172
-Prestressed slab—Skewed ... 537
-Prestressed with leg-frame supports—Analysis ... 773
-Railroad—Prestressed ... 170
-Railway—Reconstruction ... 363
-Scheme for road crossing of Firth of Forth ... 170
-Selection of design ... 709
-Skewed slab—Design ... 363
-Skew-girders—Analysis ... 71
-Skew I-beam—Simply supported—Analysis ... 169
-Slab—Analysis of transverse strength ... 71
-Strengthening and repair ... 169
-Switzerland—Prestressed—Design and construction ... 709
-Widening with concrete ... 425
British code—Handbook ... 774
Buckling
-Columns—Brittle ... 87
-Walls—Unreinforced ... 911
Budni tunnel—Design and construction ... 72
Building code—ACI—Discussion ... 429
Building frames—Concrete versus steel ... 171
Buildings
-Concrete—History ... 368
-Earthquake resistant design ... 172
-High—Design ... 75
-Industrial—Design trends ... 368
Buildings for Industry. Compiled from *Architectural Record.* F. W. Dodge Corp. ... 919

C

Cable—Prestressing—Mechanical characteristics 260
Caissons—Dry dock construction ... 710
Calcium—Complexometric determination ... 541
Calcium chloride—In concrete—Corrosion of galvanized steel ... 431
Calcium silicate hydrate—Lightweight—Characteristics ... 79
Calcium silicates—Crystallographic data ... 80
Calder Hall nuclear plant—Design ... 76
Calotte shells—Rectangular base ... 78
Candela, Felix—Résumé of work ... 425
Canopy—Cantilever—Failure test ... 436
Carlson stress meter—Tests of ... 263
Cellular concrete
-Examples of use ... 1013
-Symposium ... 631
Cement
-Barium and strontium—Investigation ... 628
-Blast furnace slag—Tests ... 436
-Blast-furnace slag—Tests of concrete ... 912
-Chemical resistance ... 542
-Effect of variations on concrete strength ... 431
-Expanding ... 79, 440
-Gypsum-slag—Discussion ... 258
-High-early strength—Russian standards compared with others ... 174
-Manufacture—Reducing slurry water content ... 365
-Mortar used in testing ... 539
-Normal and abnormal set ... 1150
-Other than portland—Discussion ... 258
-Potential composition—Device for calculating ... 257
-Reactivity inhibited ... 83
-Resistance to attack ... 713
-Setting process ... 541
-Slag—Investigation ... 430
-Slag—Value of adding slag to clinker ... 541
-Standards of the world surveyed ... 79
-Strontium oxide content ... 713
-Sulfate resistant—Behavior in sulfate solutions 174
-Testing in Sweden ... 79
-Types—Discussion ... 257
-Vibro-ground for precast concrete ... 628
Cement-aggregate reaction—Studies ... 631
Cement clinker
-Apparent density ... 258
-Microscopic study ... 1150
Cement content of fresh concrete—Determination 631
Cement paste—Hardening—Studied with electronic microscope ... 1015
Cement products—Chemical disintegration ... 175
Chemicals—Used in concrete—Review ... 912
Circular hollow elements—Analysis of stresses ... 625
Circular rings—Influence lines solve redundants ... 74
Civil engineering—Handbook ... 263
Clinker—Microscopic study ... 1150
Coatings
-Atmospheric protection—Application and characteristics ... 175
-Epoxide resin ... 628
-Latex and epoxide resin ... 629
Colloidal concrete—Prepacked process—Discussion ... 538
Columns
-Brittle—Elastic buckling ... 87
-Design by load-factor method ... 910
-Eccentrically-loaded—Load-factor method ... 712
-Hooped—Research ... 86
-Impact tests ... 1152
-Prestressed—Tested under eccentric loading ... 916
-Prestressed—Ultimate load theory ... 627
-Spun concrete—manufacture ... 366
Combined water—Determination of quantity ... 84
Composite action—Precast with cast-in-place concrete ... 87
Composite bridge—Field tests ... 170
Composite construction
-Adhesion of plain to prestressed concrete ... 437
-Bridges ... 624
-Concrete slabs on steel beams ... 1013
-German standard ... 624
-Prestressed girder design ... 75
-Used in apartment buildings ... 1014
-Experimental studies ... 632
-Influence of creep on shearing ... 428
Compression testing—Machines ... 368
Compression zone—Strength in bending ... 87
Compressive strength
-Effect of length to diameter ratio of specimen 84
-Effect of loading rate ... 84
-Effect of temperature ... 83
-Measured by Schmidt sclerometer ... 720
-Measured by sonic method ... 719
-Statistical distribution ... 720
-Use of 4-in cubes ... 84
Computer—Digital—Application to structural analysis ... 255
Concrete Industries Yearbook. Part 3—Prestressed Concrete. Peck (editor). Pit and Quarry Publications, Inc. ... 542
Concrete Pavements. Saenz de Heredia Ulloa. Instituto Tecnico de la Construccion y del Cemento ... 432
Concrete Technology. Fulton. The Concrete Association (Johannesburg) ... 440
Concrete Products Yearbook, 1958. Bauverlag GMBH ... 920
Consistency—Measurement by "Vebe" apparatus 435
Construction—Recent in France ... 624
Construction practice—Germany ... 720
Construction practices and methods ... 709
Continuity—Between precast beams and slabs ... 914
Continuous reinforcement—Pavements ... 176
Continuous shells—Analysis ... 73
"Convergence-divergence" principle of mixing ... 87
Corrosion
-Causes in concrete ... 261
-Cement-asbestos and concrete pipe ... 259
-Effect of various agents ... 86
-Galvanized steel in contact with concrete containing calcium chloride ... 431
-Inhibited by sodium benzoate ... 174
-Preventing in reinforcing ... 628
-Reinforcing steel—Salt water environment ... 542
-Resistance of cement ... 713
-Resistant finishes for floors ... 629

Costs
–Bridges—Prestressed compared to conventional 71
–Construction—Estimating 544
–Data book 543
Cracking
–Loaded beams—Expected formation 77
–Summary of present knowledge 917
–Tensile 1014
Cracks—Pavement—Resealing methods 1151
Craneway—Precast concrete 714
Creep
–Analysis—Statically indeterminate structures 430
–Behavior prediction by sonic properties 179
–Causes 715
–Coefficient developed 716
–Correlation with sonic testing 436
–Cracked beams—Effect 77
–Design theory 74
–Influence on shearing stress—Composite structures 428
–Loading system for studies 632
–Measurement in mortar 434
–Slabs and plates prestressed in two directions 1151
Creep theories—Critical review 1152
CRSI Design Handbook. Reese. Concrete Reinforcing Steel Institute 77
Cube strength—Affected by specimen size 87
Curing
–Accelerated 83
–Bibliography 367
–Pavements—Effect of method on internal temperature 909
–Requirements for scale resistance 85
–Requirements for water 431
–Steam—Optional conditions 538
–Steam—Tests examine factors affecting strength 625
–Use of infra-red radiation 179
Cylindrical shells—Short—Table of functions 75

D

Dams
–Algeria—Review 426
–Allt-Na-Lairige—Prestressed concrete—Design and construction 171
–Arch—Design and construction 171
–Arch—Italian—Behavior observed 73
–Arch—Review of experience 254
–Arch gravity—Built in narrow valley 171
–Avon—Construction 72
–Cancano II—Construction 254
–Foundation to power plant 253
–General treatment 183
–Gravity—Design and construction 774
–Ikawa—Winter concreting 774
Deflections—Beams—Computation 428
Deformation
–Nonelastic 715
–Theory 83
Density—Application of radioactive isotopes to measurement 719
Densification—Relation to applied load 716
Design and Construction of Engineering Foundations. Henry. McGraw-Hill Book Co. 75
Design handbook
–German 430
–Reinforced concrete 364
Design of Concrete Structures. Urquhart, O'Rourke, and Winter. McGraw-Hill Book Co. 1150
Design of Elevated Water Tanks. Gauthron. Editions Eyrolles 254
Design textbook—Reinforced concrete 438
Deterioration—Concrete foundation—Investigation 631
Dispersing agent—Effect on permeability 714
Docks—Floating—Precast 915
Doweled joints
–Airfield pavement 913
–Performance under repetitive loading in pavement 1150
Dowels—Studied in airfield expansion joints 176
Ducts—Formed by rubber tubes in manufacture of precast units 440
Durability
–Bibliography on physical aspects 86
–Cement products 175
–Concrete in buildings—Review 366
–Effect of heavy-media separation 173
–Michigan aggregates 173
Dynamic modulus—Effect of frequency 717
Dynamic response—Structures—Three-dimensional linear 73

E

Earth Pressures and Retaining Walls. Huntington. John Wiley & Sons, Inc. 440
Earthquake design—Buildings 172
Earthquake stresses
–Floors 74
–Shells 255
Effects of Nuclear Weapons. United States Atomic Energy Commission. U. S. Government Printing Office 543
Efficiency—Design for 632
Efflorescence—Effect of backup materials 368
Elastic design
–Structures without stress-load proportionality 1150
–Theory 74
Elastic limit—Stress relations at 429
Elastic theory—Boundaries—Critical volume-of-expansion theory 429
Elastiscope 182
Electro-osmosis
–Increase of concrete strength 181
–Investigation for reducing water in concrete 180
Electrolysis—Between steel and concrete 1152
Electrons—Emission by concrete under compression 180
Elemenatary Statics of Shells. Pfluger. Springer-Verlag 426
Elementary Theory of Structures. Wang and Eckel. McGraw-Hill Book Co. 74
Elutriation—Aggregate grading 432
Engineering Structural Failures. Hammond. Philosophical Library 264
Epoxide resin—Surface coating for concrete 628, 629
Epoxy-thiokol adhesive—Repairs 173
Epoxy-thiokol adhesives 431
Estimating General Construction Costs. Dallavia. F. W. Dodge Corp. 544
Expanding cement 79
Explanatory Handbook on the British Standard Code of Practice for Reinforced Concrete, No. 114, 1957. Scott, Glanville, and Thomas. Concrete Publications Ltd. 774

F

Failure
–In engineering structures 264
–Mode—Effect of coarse aggregate 1016
–Probability studied statistically 718
–Theories reviewed 429
–Theory 83
Failure test—Cantilever concrete canopy 436
False set—Cement—Discussion 1150
Farm construction—Use of concrete 88
Fatigue
–Endurance test of prestressed beam 915
–Prestressed concrete 434
–Resistance of prestressed beams in bending 715
–Test of vibration resistance of structures 437
–Tests on prestressed beams 919
Filler block—Composite floor construction 72
Finishing—Obtaining very smooth surface 253
Fire protection—Buildings 72
Fire resistance—Prestressed concrete 715
Fire tests—Exploratory—Small scale specimens 1016
Flash set—Cement—Discussion 1150
Floors
–Auditorium—Reconstruction in prestressed concrete 364
–Composite, prestressed design 916
–Composite steel joists with filler block 72
–Corrosion-resistant finishes 629
–Earthquake stresses 74
–Industrial—Construction 1149
–Load tests 262
Fluorine gas—Curing—Increases chemical resistance 366

Fly ash
-Admixture ... 431
-Australian—Use in concrete ... 912
-Sintered—Lightweight aggregate (Terlite) ... 540
-Sintered for aggregate ... 540
-Use in concrete—Properties ... 432
-Use in concrete—Study ... 432, 1014
-Use in concrete for power station ... 258
Foam concrete
-Beams—Diagonal shear reinforcing ... 86
-Shrinkage and swelling tests ... 85
-Symposium ... 631
Folded plate roof—Church ... 75
Folded plate roofs ... 1013
Folded-plate structures—Theory ... 255
Footings
-Gage for determining loose friction ... 919
-Pile—Tests ... 718
Form lining—Wood wool ... 539
Forms
-Design—Special applications ... 909
-European technique—Review ... 773
-Insulated for winter bridge construction ... 773
-Precast panels ... 259
-Steel plate lining ... 253
Foundations
-Circular ring—Analysis of settlement ... 427
-Circular ring—Analysis of tilting ... 427
-Dam power plant ... 253
-Design and construction ... 75
-Design manual ... 1016
-Deterioration ... 631
-Gage for determining base friction ... 919
-Engineering principles ... 438
-Forging hammer—Cork insulation ... 88
-Machinery—Method of direct dimensioning ... 627
-Turbogenerator—Method of recording vibration ... 920
Fourier method—Multiple—Stress analysis of post-tensioned beam ... 179
Frames
-Computing degree of redundancy ... 256
-Concrete versus steel in buildings ... 171
-Continuous—Prestressed—Analysis ... 178
-Elipse of elasticity principle—Analysis ... 711
-Iterational analysis ... 364
-Nomograms—Analysis ... 426
-Prestressed—Prototype used in design of building ... 632
-Prestressed and reinforced—Ultimate load theory ... 171
-Rigid—Hinges ... 437
-Tall buildings—Analysis ... 428
-Ultimate load design research ... 710
-Vibration—Calculation of natural frequencies ... 627
Freezing and thawing—Automatic equipment for comparative test results ... 544
Freyssinet system—Prestressing ... 260
Frost action—Pavements ... 542
Frost damage—Pavements ... 183
Frost resistance
-Michigan aggregates ... 173
-Steam-cured concrete—Use of sulfate alcohol wash water ... 180
-Tests of concrete from different cements ... 86
-Vacuum concrete ... 773
Fundamentals of Statically Indeterminate Structures. Shermer. Ronald Press Co. ... 254

G

Gas concrete
-Beams tested for shear ... 86
-Properties ... 1151
-Shrinkage and swelling ... 85
-Symposium ... 631
Geoelectric measurements—Concrete structures ... 920
German Concrete Association—Proceedings 1954 ... 182
Girders
-Composite—Direct design ... 257
-Composite—Pretensioned—Design ... 75
-Elastically supported—Calculation diagrams ... 76
-Skew—Bridge—Analysis ... 71
-Wall-type—Design tables ... 365
Glass—Tested as reinforcement for concrete ... 912
Grading—Hydraulic separators ... 174
Grids
-Beam—Influence areas ... 78
-Negligible torsional stiffness—Analysis by basic functions ... 428
-Relationships useful in analysis ... 427
Grills—Flat, simply supported—Design for minimum weight ... 627
Grout
-High turbulence mixing—Research ... 627, 1150
-Properties required for prestressed concrete ... 628
Grouting
-Influence of various factors on penetration in fine fissures ... 539
-Mortar mixed in high turbulence mixer ... 538
-Rock—General aspects ... 88
Gunite—Survey of structural uses ... 170
Gypsum-slag cement ... 258

H

Handbook—Structural design of buildings German ... 430
Hangars—Cantilevered folded plate roofs—construction ... 1013
Hardening—Thermal—Optimum conditions ... 715
Hardening theories—Critical review ... 1152
Hardness—Apparatus for approximate test—Russian ... 544
Heavy-media separation—Effect on concrete durability ... 173
Helical beams—Symmetrical—Analysis ... 712
High-early cement—Russian standards compared with others ... 174
High strength concrete—Preparation ... 1014
High strength steel
-Allowable stresses ... 80
-Economic considerations ... 1152
High-tensile steel
-Reinforcement ... 911
-Theoretical and practical aspects ... 257
Hinges—In frames and arches—Investigation ... 437
Hipped plate structures—Analysis by influence coefficients ... 256
Houses—Precast—Design and construction ... 714
Hydroelectric plants—Design and construction in Britain ... 367
Hyperstatic structures—Analysis ... 429

I

Impact load—Effect on compressive strength ... 84
Impact tests
-Bridge rails ... 170
-Columns ... 1152
Impulse testing—Beams—Instrumentation and method ... 918
Indirect tensile tests—Analysis of stress distribution ... 261
Inelastic stress—Distribution in concrete ... 182
Influence line—Solves redundants in circular rings ... 74
Infra-red curing ... 179
Inspection — Concrete and materials — Recommended practice ... 544
Insulation
-Precast floors ... 176
-Prestressed roof elements ... 1151

J

Jetty
-Kwinana—Prestressed—Construction ... 83
-Precast, prestressed—Construction ... 914
Joints
-Contraction—Performance test of pavements ... 914
-Doweled—Pavement—Performance under repetitive loading ... 1150
-Pavement—Cleaning and resealing ... 176
-Pavement—Current practice—Jointing, sealing, equipment ... 176
-Pavement—Expansion—Use of dowels ... 176
-Pavement—Resealing methods ... 1151
-Precast concrete—Efficiency ... 262
-Rigid frames—Moment distribution and slope deflection ... 74

K

Keokuk Dam—Spillway repair ... 73
Koroukin anchorage system ... 182
Kwinana jetty—Prestressed—Construction ... 83

L

Latex resin—Surface coatings ... 629
Lee-McCall beams—Fatigue tests ... 919
Leoba bars and cables ... 81
Lift slab—Construction methods ... 425
Lightweight aggregates—Sintering ... 79
Lightweight concrete—Cellular—Examples of use 1013
Limit analysis—Structures ... 173
Load-factor method—Design of columns ... 712, 910
Load factors—Prestressed bridges ... 773
Loading rate—Effect on concrete properties ... 84
Loads—Minimum design—ASA standard ... 711
Long-term loads—Structural stability under ... 172

M

Magnesium—Complexometric determination ... 541
Manual on Reinforced Concrete. Guerrin. Editions Dunod ... 1016
Masonry—Architectural uses ... 81
Mass concrete
-Temperature calculation ... 1153
-Use of maximum size aggregate ... 714
Materials—Strength (textbook) ... 718
Membrane stresses—Elliptical paraboloid ... 75
Meteorological loads—Design data ... 711
Methods of Foundation Engineering. Zdenek. Czechoslovak Academy of Science ... 438
Mexico—Review of construction ... 425
Mine shaft—Lining ... 368
Mixing
-Principle of "convergence-divergence" ... 87
-Prolonged—Effect on properties of concrete ... 180
-Requirements for water ... 431
Mobility meter—Consistency measurement of fresh concrete ... 716
Model analysis—Pavements ... 433
Models
-Analysis of building frame ... 910
-Plasterene—Aid to structural design ... 437
Model study—Rigid pavement—Corner and edge loadings ... 176
Modulus of elasticity
-Determined on 4 x 1 x 16-cm mortar prisms ... 541
-Static and dynamic ... 630
Moisture content—Application of radioactive isotopes to measurement ... 719
Moisture meter
-Neutron—Nondestructive test of concrete ... 1016
-Using fast-neutron source and slow-neutron ... 182
Moment distribution—Joints in rigid frames free to translate—Analysis ... 74
Mortar
-Air entrainment in ... 80
-Cement testing—Study ... 539
-High turbulence mixing ... 538
-Measurement of creep ... 434
-Uniformity of strength—Tests ... 78

P

Paraboloid—Elliptical—Membrane stresses ... 75
Parking garage—Copenhagen—Construction ... 624
Patching—Pavements ... 176
Pavement bases—Soil stabilization ... 914
Pavements
-Condition surveys—Suggested criteria ... 1015
-Construction ... 432
-Construction in England ... 432
-Continuous ... 365
-Contraction joints—Performance test ... 914
-Joints—Current practice ... 176
-Materials—Testing ... 541
-Model analysis of stresses ... 433
-Model studies under corner and edge loadings ... 176
-Plain and reinforced—Performance test ... 913
-Prestressed—Experimental studies ... 714
-Prestressed design ... 433
-Problems of concrete use ... 433
-Pumping—Study ... 913
-Reinforcement—Placing ... 80
-Research review ... 365
-Resurfacing—Bibliography ... 365
-Resurfacing and patching ... 176
-Sector analysis ... 81
-Skidding resistance ... 433
-Strains caused by heavy indivisible load ... 629
-Subbase evaluation ... 433
-Thermal effects ... 914
Permeability—Effect of dispersing agent ... 714
Photoelastic studies—Tunnel lining ... 711
Photogrammetry—Measurement of deformation in structures ... 543
Piers
-Construction ... 253
-Prestressed concrete—Construction ... 82
-Rehabilitation ... 919
Pile caps—Investigation of stress distribution (applicable to other rectangular section) ... 626
Pile footings—Tests ... 718
Piles—Small-scale load tests ... 917
Piling—Sheet—Prestressed ... 434
Pipe
-Corrosion in New Zealand soil ... 259
-Design for under earth fill ... 173
-Prestressed—Manufacture ... 630
Plaster—Adhesion to concrete—Tests ... 258
Plastic hinge—Solution in curved beams with radial stress ... 911
Plastic hinge method—Limit analysis ... 173

INDEX to *Proceedings*

AMERICAN CONCRETE INSTITUTE

VOLUME 54—1957-58

From JOURNAL OF THE AMERICAN CONCRETE INSTITUTE, V. 29, July 1957 to June 1958 and Part 2, September and December 1958

Original contributions to the JOURNAL OF THE AMERICAN CONCRETE INSTITUTE—papers, reports and discussions—are indexed in three categories:

1. Title..... **Spacing of spliced bars in beams (54-38)** S. J. Chamberlin Feb. 1958..... 689

2. Author..... **Chamberlin, S. J.**—Spacing of spliced bars in beams (**54-38**) Feb. 1958..... 689

3. Subject..... **Reinforcement**—Spacing of splices in beams—Effect on bond (**54-38**) Feb. 1958..... 689

Numbers in parentheses with each entry constitute the title number of the article. The first portion indicates the number of the *Proceedings* volume (in this case V. 54) in which the topic appears. The month and year indicate the JOURNAL issue. Page numbers of both *Proceedings* and JOURNAL are the same.

Concrete Briefs items and Problems and Practices items carry an identifying (**54-CB**) or (**54-P & P**) wherever they are entered in the index.

Haydite aggregate concrete—Mix proportions (**54-CB**) Oct. 1957..... 357

Form oil—Best for use with steel forms (**54-P&P**) Oct. 1957..... 361

The index to Current Reviews published in this volume begins on p. 1453.

The index to technical material published in the "News Letter" sections (not a part of or bound with the *Proceedings*) is found on p. 1461. This index is included for the convenience of readers who retain the monthly issues.

A

Abdun-Nur, Edward A.
–Disc. Failure of Concrete Structures (**54-25**) June 1958 ... 1197
–Disc. Tentative recommendations for thin-section reinforced precast construction (**54-51**) Part 2, Dec. 1958 ... 1383

Abeles, P. W.
–Disc. Creep and creep-recovery of concrete under high compressive stress (**54-66**) Part 2, Dec. 1958 ... 1433
–Disc. Tentative recommendations for prestressed concrete (**54-30**) Part 2, Dec. 1958 ... 1217

Abrasion resistance—Concrete coated with neoprene latex (**54-4**) July 1957 ... 51

Acid wastes—Sewage—Effect on concrete (**54-40**) Mar. 1958 ... 733

ACI's decade of progress (**54-44**) Walter H. Price Apr. 1958 ... 825

Admixtures
–Calcium chloride—Effect on concrete (**54-P&P**) Aug. 1957 ... 168
–Winter concreting in Europe (**54-19**) Nov. 1957 369

Age of concrete
–Effect on compressive strength (**54-66**) June 1958 ... 1111
–Effect on modulus of elasticity (**54-66**) June 1958 ... 1111

Age of concrete at loading—Effect on creep (**54-49**) Apr. 1958 ... 879

Aggregates
–Expanded shale and clay—Australian experiments (**54-CB**) Nov. 1957 ... 422
–Expanded shale (Georgia)—Properties (**54-33**) Jan. 1958 ... 605
–Grading—Related to specific surface (**54-50**) Apr. 1958 ... 897
–Grading for thin precast concrete elements (**54-51**) May 1958 ... 921
–Haydite—Specific gravity, absorption, and moisture data (**54-CB**) Oct. 1957 ... 357
–Iron ore, iron, and steel for radiation shielding concrete (**54-56**) May 1958 ... 965
–Lightweight—Requirements for structural concrete (**54-29**) Dec. 1957 ... 527
–Lightweight—Tested in structural concrete (**54-16**) Oct. 1957 ... 299
–Lightweight concrete—Proportioning and control (**54-61**) June 1958 ... 1059
–Lightweight (expanded shale)—Use in structural quality concrete (**54-33**) Jan. 1958 ... 605
–Selection for high-density concrete (**54-56**) May 1958 ... 965
–Specific surface—Effect on density of concrete (**54-50**) Apr. 1958 ... 897
–Specific surface—Effect on modulus of rupture (**54-50**) Apr. 1958 ... 897
–Specific surface—Related to compressive and flexural strength (**54-50**) Apr. 1958 ... 897
–Test roads of long-time study (**54-59**) June 1958 1017

Air-entrained concrete—Marine structures (**54-45**) Apr. 1958 ... 841

Air-entraining agents—Requirements—Effect of temperature (**54-62**) June 1958 ... 1063

Air entrainment
–Control (**54-34**) Feb. 1958 ... 633
–Effect on lightweight structural concrete (**54-33**) Jan. 1958 ... 605
–Reproportioning non-air-entrained mixtures to entrain air and maintain certain properties (**54-34**) Feb. 1958 ... 633
–Requirements in sewage-work concrete (**54-40**) Mar. 1958 ... 733
–Summary of current knowledge (**54-34**) Feb. 1958 ... 633

Alexander, Michael—Disc. Proposed revision of ACI standard 711-53; minimum standard requirements for precast concrete floor and roof units (**54-24**) June 1958 ... 1191

Alkali-aggregate reaction
–Effect of portland slag cement (**54-13**) Sept. 1957 ... 205
–Lightweight structural concrete (**54-16**) Oct. 1957 ... 299
–Marine structures (**54-45**) Apr. 1958 ... 841

Anchorage
–Code requirements changed in 1956 (**54-11**) Sept. 1957 ... 185
–Effect on shear failure (**54-15**) Oct 1957 ... 265
–Prestressed concrete recommendations (**54-30**) Jan. 1958 ... 545

Apartment building—Constructed with slip-forms (**54-43**) Mar. 1958 ... 767

Arches—Analyzed by elastic-center method (**54-58**) May 1958 ... 987

Au, Tung
–Ultimate strength design charts for columns controlled by tension (**54-26**) Dec. 1957 ... 471
–Ultimate strength design of rectangular concrete members subject to unsymmetrical bending (**54-36**) Feb. 1958 ... 657
–Disc. Bearing capacity of concrete (**54-22**) June 1958 ... 1183

Auditorium—Dallas Memorial—Design and construction (**54-17**) Oct. 1957 ... 329

Autoclaving—Effect on strength of cement-silica mixtures (**54-9**) Aug. 1957 ... 127

B

Balog, Louis
–Disc. Destructive impulse loading of reinforced concrete beams (**54-14**) Mar. 1958 ... 811
–Disc. Failures of concrete structures (**54-25**) June 1958 ... 1197

Bar spacing—Effect on shear failure (**54-15**) Oct. 1957 ... 265

Bars
–Spliced—Spacing in beams (**54-38**) Feb. 1958 ... 689
–Test for relative bond value (**54-6**) Aug. 1957 ... 89

Basalite—Use in structural lightweight concrete (**54-61**) June 1958 ... 1059

Bauman, E. W.—Disc. Lightweight-aggregate concrete for structural use (**54-16**) June 1958 .. 1165

Beams
–Continuous—General creep behavior (**54-49**) Apr. 1958 ... 879
–Destructive impulse loading—Tests on various reinforcement grades (**54-14**) Sept. 1957 ... 233
–Flexural cracking from pure bending (**54-48**) Apr. 1958 ... 865
–Impulse load testing (**54-14**) Sept. 1957 ... 233
–Lapped splices—Stirrup requirements (**54-CB**) Nov. 1957 ... 421
–Prestressed—Full size—Tests to failure (**54-57**) May 1958 ... 979
–Prestressed expanded shale and conventional concrete with strand steel—Fatigue and static tests (**54-10**) Aug. 1957 ... 141
–Rectangular—Ultimate torsional properties tested (**54-18**) Oct. 1957 ... 341
–Shallow—Supporting line loads—Effective width (**54-P&P**) Oct. 1957 ... 361
–Simply supported—Creep (**54-49**) Apr. 1958 ... 879
–Spacing of spliced bars—Effect on bend (**54-38**) Feb. 1958 ... 689
–Static and fatigue strength in shear, with tensile reinforcement (**54-60**) June 1958 ... 1033
–Ultimate shear strength—Without shear reinforcement (**54-15**) Oct. 1957 ... 265
–Ultimate strength tests (**54-CB**) Nov. 1957 ... 423
–Under-reinforced—Long-term load effects (**54-2**) July 1957 ... 21
–Used to form multibeam bridges (**54-28**) Dec. 1957 ... 505
–Warping due to shrinkage—Test program (**54-53**) May 1958 ... 939
–With compression reinforcement—Proposed revision of ultimate strength design assumptions (**54-42**) Mar. 1958 ... 759

Bearing capacity—Footings—Stone and concrete (**54-22**) Nov. 1957 ... 405

Bearing capacity of concrete (**54-22**)
–William Shelson, Nov. 1957 ... 405
–Disc. Tung Au, D. Campbell-Allen, W. G. Plewes, Maurice Royer, and Author, June 1958. 1183

Bending—Pure—Flexural cracking in beams (**54-48**) Apr. 1958 ... 865

Berman metal locator—Electronic device for locating reinforcement in concrete (**54-CB**) Feb. 1958 ... 705

Bertero, Vitelmo—Disc. Flexural cracks in reinforced concrete beams (**54-48**) Part 2, Dec. 1958 ... 1347

Black, R. H.—Elevated temperatures of portland cement mixtures related to surface removal (**54-32**) Jan. 1958 ... 591

Blakey, F. A.
–Expanded shale or clay concrete (**54-CB**) Nov. 1957 422
–Disc. Effects of revibrating concrete (**54-39**) Part 2, Sept. 1958 1267
Blast furnace slag—Chemical data (**54-13**) Sept. 1957 205
Blast furnace slag cement—Properties studied (**54-13**) Sept. 1957 205
Blast resistance—Reinforcement grades compared (**54-14**) Sept. 1957 233
Bleeding—Effect of revibration (**54-39**) Mar. 1958 721
Block—High-density—Radiation shielding (**54-56**) May 1958 965
Block walls—Transverse strength (**54-54**) May 1958 951
Bond
–Prestressed beams—Fatigue and static tests (**54-10**) Aug. 1957 141
–Prestressed concrete recommendations (**54-30**) Jan. 1958 545
–Relative value of reinforcing bars—Test procedure (**54-6**) Aug. 1957 89
Bond strength
–Lightweight aggregate concrete for structural uses (**54-16**) Oct. 1957 299
–Lightweight structural concrete (**54-33**) Jan. 1958 605
Borges, J. Ferry—Disc. Flexural cracks in reinforced concrete beams (**54-48**) Part 2, Dec. 1958 1347
Boron—Use in high-density concrete (**54-56**) May 1958 965
Boswell, L. D.—Disc. Tentative recommendations for prestressed concrete (**54-30**) Part 2, Sept. 1958 1217
Brandvold, W. W.—Topping pavements with calcium aluminate cement concrete (**54-CB**) May 1958 1009
Brice, Louis P.—Disc. Strength of concrete under combined tensile and compressive stress (**54-45**) Part 2, Dec. 1958 1301
Bridges
–Multibeam—Investigation and design (**54-28**) Dec. 1957 505
–Precast slab units with stiffened edges—Design (**54-63**) June 1958 1083
–Prestressed beam tested to failure (**54-57**) May 1958 979
British Code of Practice—Permissible shear stresses criticized (**54-CB**) June 1958 1146
Brock, Geoffrey—Disc. Static and fatigue strength in shear of beams with tensile reinforcement (**54-60**) Part 2, Dec. 1958 1425
Browzin, Boris J.—Disc. Concept of elastic parameters (**54-58**) Part 2, Dec. 1958 1415
Brotchie, John F.—General method for analysis of flat slab and plates (**54-3**) July 1957 31
Brown, L. S.—Disc. Use of concrete in marine environments (**54-46**) Part 2, Dec. 1958 1309
Bryan, Ross H.—Disc. Tentative recommendations for prestressed concrete (**54-30**) Part 2, Sept. 1958 1217
Building code
–Changes in 1956—Review (**54-11**) Sept. 1957 185
–Evolution and philosophy (**54-11**) Sept. 1957 185
–Ultimate strength design—Explanatory notes (**54-12**) Sept. 1957 197

C

Cacho, Luis Giminez—Disc. High strength steel and concrete result in minimum column sizes (**54-52**) Part 2, Dec. 1958 1389
Calcium aluminate cement—Used in topping pavements (**54-CB**) May 1958 1009
Calcium chloride
–Effect on concrete (**54-P&P**) Aug. 1957 168

Detrusion coefficient—Development and use in torque equations (**54-18**) Oct. 1957 ... 341
Diagonal tension—Lightweight structural concrete (**54-33**) Jan. 1958 ... 605
Diagonal tension cracking—Beams under static and fatigue loading (**54-60**) June 1958 .. 1033
Dikkers, Robert D.—Disc. Transverse strength of concrete block walls (**54-54**) Part 2, Dec. 1958 1403
Dockweiler, E. V.—Use of concrete in marine environments (**54-45**) Apr. 1958 ... 841
Doggett, John H.—First slip-formed apartment building in the United States (**54-43**) Mar. 1958 767
Dome—Constructed in pie-shaped segments (**54-17**) Oct. 1957 ... 329
Driskell, John J.—Multispan prestressed folded plate roof for Langendorf Bakery (**54-8**) Aug. 1957 ... 115
Drying rate—Effect on creep (**54-49**) Apr. 1958 .. 879
Durability—Effect of neoprene latex coating (**54-4**) July 1957 ... 51
Dynamic loading—Tests on beams with various grades of reinforcement (**54-14**) Sept. 1957 233

E

Effect of a waterproof coating on concrete durability (54-4)
–Warrington G. Mitchell, July 1957 ... 51
–Disc. Celso A. Carbonell and George L. Otterson, Mar. 1958 ... 797
Effect of column width on continuous beam moment (54-CB) Henri C. Hepp and Thor Germundsson, June 1958 ... 1143
Effect of mixing and curing temperature on concrete strength (54-62) Paul Klieger, June 1958 ... 1063
Effect of tobermorite on the mechanical strength of autoclaved portland cement-silica mixtures (54-9) L. Dean Sanders and W. J. Smothers Aug. 1957 ... 127
Effects of revibrating concrete (54-39)
–C. A. Vollick, Mar. 1958 ... 721
–Disc. Robert G. Erwin, E. N. Mattison and F. A. Blakey, Lewis H. Tuthill, and Author, Part 2, Sept. 1958 ... 1267
Efsen, Axel—Disc. Flexural cracks in reinforced concrete beams (**54-48**) Part 2, Dec. 1958 1347
Elastic-center method—Integrated from elastic parameter concept—Analysis of frames and arches (**54-48**) May 1958 ... 987
Elastic parameter concept—Integrated to elastic-center method for analysis of frames and arches (**54-58**) May 1958 ... 987
Elastic properties—Related to cement performance (**54-27**) Dec. 1957 ... 481
Elevated temperatures of portland cement mixtures related to surface removal (54-32) R. H. Heiskell, R. H. Black, R. J. Crew, and H. Lee, Jan. 1958 ... 591
End blocks—Recommendations for prestressed concrete (**54-30**) Jan. 1958 ... 545
Ennenga, J. L.—Transverse strength of concrete block walls (**54-54**) May 1958 ... 915
Ernst, G. C.—Ultimate torsional properties of rectangular reinforced concrete beams (**54-18**) Oct. 1957 ... 341
Erskine, Frank G.—Disc. Tentative recommendations for thin-section reinforced precast construction (**54-51**). Part 2, Dec. 1958 1383
Erwin, Robert G.—Disc. Effects of revibrating concrete (**54-39**) Part 2, Sept. 1958 ... 1267
Expanded shale concrete—Prestressed—Beam tests (**54-10**) Aug. 1957 ... 141
Expanded shale or clay concrete (54-CB) F. A. Blakey and R. D. Hill Nov. 1957 ... 422
Expansion—Thermal—Effect of high temperatures (**54-55**) Apr. 1958 ... 857
Expansion joints—Eliminated in Military Personnel Records Center (**54-63**) June 1958 1103
Explanatory notes on appendix (ultimate strength design) to "Building Code Requirements for Reinforced Concrete (ACI 318-56)" (54-12) Committee 318, Sept. 1957 .. 197

F

Failures
–Beams in fatigue (**54-60**) June 1958 ... 1033
–Bearing wall deficiency (**54-25**) Dec. 1957 449
–Concrete mix defects (**54-25**) Dec. 1957 449
–Design deficiency (**54-25**) Dec. 1957 449
–Drafting errors (**54-25**) Dec. 1957 449
–Erection failures (**54-25**) Dec. 1957 449
–Formwork (**54-25**) Dec. 1957 449
–Foundations deficiency (**54-25**) Dec. 1957 449
–Frost protection deficiency (**54-25**) Dec. 1957 .. 449
–Secondary stresses (**54-25**) Dec. 1957 449
–Supervision omission (**54-25**) Dec. 1957 449
–Temperature and shrinkage (**54-25**) Dec. 1957. 449
Failures of concrete structures (54-25)
–Jacob Feld, Dec. 1957 ... 449
–Disc. Edward A. Abdun-Nur, Louis Balog, R. M. Gensert, J. J. Polivka, E. M. Rensaa, Paul Rogers, Henry H. Werner, and Author June 1958 ... 1197
Fatigue—Beams—Expanded shale and conventional concrete prestressed with steel strand (**54-10**) Aug. 1957 ... 141

Fatigue and static tests of steel strand prestressed beams of expanded shale concrete and conventional concrete (54-10)
–Gene M. Nordby and William J. Venuti, Aug. 1957 ... 141
–Disc. A. M. Ozell and Authors, Mar. 1958 ... 803
Fatigue machine—Tests of prestressed beams (**54-10**) Aug. 1957 ... 141
Fatigue strength—Shear—Beams with tensile reinforcement (**54-60**) June 1958 ... 1033
Feld, Jacob—Failures of concrete structures (**54-25**) Dec. 1957 ... 449
Ferguson, Phil M.—Disc. Warping of reinforced concrete due to shrinkage (**54-53**) Part 2, Dec. 1958 ... 1393
Fey, E. H.—Disc. Destructive impulse loading of reinforced concrete beams (**54-14**) Mar. 1958 ... 811
Field control—Lightweight structural concrete (**54-33**) Jan. 1958 ... 605
Fiesenheiser, E. I.—Critical look at slab design methods, A (**54-21**) Nov. 1957 ... 397
Finishing—Lightweight structural concrete (**54-29**) Dec. 1957 ... 527
First slip-formed apartment building in the United States (54-43) John H. Doggett, Mar. 1958 ... 767
Flame treatment—Effect on decomposition of concrete surfaces (**54-32**) Jan. 1958 ... 591
Flat plates—Analysis—General method (**54-3**) July, 1957 ... 31
Flat slabs
–Analysis—General method (**54-3**) July 1957 ... 31
–Code changes in 1956 (**54-11**) Sept. 1957 ... 185
–Ultimate shear strength—Without shear reinforcement (**54-15**) Oct. 1957 ... 265
Flentje, M. E.—Study of concrete pipe in service (**54-35**) Feb. 1958 ... 647
Flexural cracking—Beams in pure bending (**54-48**) Apr. 1958 ... 865
Flexural cracks in reinforced concrete beams (54-48)
–Michael Chi and Arthur F. Kirstein, Apr. 1958 ... 865
–Disc. Vitelmo Bertero, J. Ferry Borges, Axel Efsen, and H. Krenchel, Frederick A. Nassaux, Sven Ödman, Hubert Rüsch and Gallus Rehm, A. Zaslavsky, and Authors. Part 2, Dec. 1958 ... 1347
Flexural strength
–Effect of aggregate specific surface (**54-50**) Apr. 1958 ... 897
–Lightweight aggregate concrete for structural uses (**54-16**) Oct. 1957 ... 299
–Lightweight structural concrete (**54-33**) Jan. 1958 ... 605
Flexure—Prestressed concrete recommendations (**54-30**) Jan. 1958 ... 545
"Floating" slab—General method of slab analysis (**54-3**) July 1957 ... 31
Floors
–Precast unit—Curing and handling—Recommended practice (**54-24**) Dec. 1957 ... 441
–Precast unit—Design—Recommended practice (**54-24**) Dec. 1957 ... 441
–Precast unit—Holes and openings—Recommended practice (**54-24**) Dec. 1957 ... 441
–Precast unit — Installation — Recommended practice (**54-24**) Dec. 1957 ... 441
–Precast unit — Manufacture — Recommended practice (**54-24**) Dec. 1957 ... 441
–Precast unit—Materials—Recommended practice (**54-24**) Dec. 1957 ... 441
–Precast unit—Testing—Recommended practice (**54-24**) Dec. 1957 ... 441
–Warehouse—On ground—Design (**54-7**) Aug. 1957 ... 105
Fluck, P. G.—Creep of plain and reinforced concrete (**54-49**) Apr. 1958 ... 879
Fluss, Paul J.
–Uniform structural lightweight aggregate concrete through careful proportioning and control (**54-61**) June 1958 ... 1059
–Disc. Lightweight structural concrete proportioning and control (**54-33**) Part 2, Sept. 1958 ... 1243
–Disc. Use of concrete in marine environments (**54-46**) Part 2, Dec. 1958 ... 1309
Fly ash—Cement replacement—Proportioning problems (**54-64**) June 1958 ... 1093
Folded plate roof—Lightweight, prestressed concrete—Design and construction (**54-8**) Aug. 1957 ... 115
Footings
–Bearing capacity of concrete and stone (**54-22**) Nov. 1957 ... 405
–Ultimate shear strength—Without shear reinforcement (**54-15**) Oct. 1957 ... 265
Form oil—Best for use with steel forms (**54-P&P**) Oct. 1957 ... 361
Forms
–Dome sections and columns of Dallas auditorium (**54-17**) Oct. 1957 ... 329
–Sliding—10-story building (**54-43**) Mar. 1958 ... 767
–Use with high-density concrete (**54-46**) May 1958 ... 965
–Winter concreting in Europe (**54-19**) Nov. 1957 ... 369
Formwork—Failures (**54-25**) Dec. 1957 ... 449
Foundations
–Bearing capacity of stone and concrete (**54-22**) Nov. 1957 ... 405
–Defects leading to structure failures (**54-25**) Dec. 1957 ... 449
–Press—Strengthened by post-tensioning (**54-55**) May 1958 ... 961
Fox, Charles J.—Disc. Tentative recommendations for prestressed concrete (**54-30**) Part 2, Sept. 1958 ... 1217
Frame members—Ultimate shear strength—Without shear reinforcement (**54-15**) Oct. 1957 ... 265
Frames
–Analyzed by elastic-center method (**54-58**) May 1958 ... 987
–Continuous—Subjected to temperature stresses—Distribution method for analyzing (**54-23**) Nov. 1957 ... 415
Freeman, P. O.—Disc. Proposed revision of ACI standard 711-53: minimum standard requirements for precast concrete floor and roof units (**54-24**) June 1958 ... 1191
Freezing and thawing—Tests of slag cement concrete (**54-13**) Sept. 1957 ... 205
Frei, Otto C.—Lightweight structural concrete proportioning and control (**54-33**) Jan. 1958 ... 605
Freudenthal, A. M.—Creep and creep recovery of concrete under high compressive stress (**54-66**) June 1958 ... 1111
Frost protection—Effect on failures (**54-25**) Dec. 1957 ... 449

G

Gallia, Andrew—Precast reinforced concrete slab bridges with stiffened edges (**54-63**) June 1958 ... 1083
Garden, R. J. P.—Disc. Concept of elastic parameters (**54-58**) Part 2, Dec. 1958 ... 1415
General method for analysis of flat slab and plates (54-3)
–John F. Brotchie, July 1957 ... 31
–Disc. James Chinn and Author, Mar. 1958 ... 787
Gensert, R. M.
–Disc. Failures of concrete structures (**54-25**) June 1958 ... 1197
–Disc. Multistory lift-slab construction (**54-31**) Part 2, Sept. 1958 ... 1237
Germundsson, Thor—Effect of column width on continuous beam moment (**54-CB**) June 1958 ... 1143

Pabarcius, A.—Disc. Ultimate strength design of rectangular concrete members subject to unsymmetrical bending (**54-36**) Part 2, Sept. 1958 1253
Pavements
–Cement performance—Long-time study (**54-59**) June 1958 ... 1017
–Topped with calcium aluminate cement concrete (**54-CB**) May 1958 ... 1009
Permissible concrete shear stresses of the 1957 British Code of Practice (**54-CB**) C. B. Wilby, June 1958 ... 1146
Philleo, Robert—Some physical properties of concrete at high temperatures (**54-45**) Apr. 1958 857
Piles
–Asphalt impregnated for marine environments (**54-45**) Apr. 1958 ... 841
–Durability—In-service study (**54-45**) Apr. 1958 841
Pipe—Lime leaching of in-service water lines (**54-35**) Feb. 1958 ... 647
Placing
–Concrete for Dallas auditorium (**54-17**) Oct. 1957 ... 329
–High-density concrete (**54-56**) May 1958 ... 965
–Lightweight structural concrete (**54-29**) Dec. 1957 ... 527
Plaster—Gypsum—Applied to interior concrete surfaces (**54-P&P**) May 1958 ... 1012
Plates—Flat—Analysis—General method (**54-3**) July 1957 ... 31
Plewes, W. G.—Disc. Bearing capacity of concrete (**54-22**) June 1958 ... 1183
Poisson's ratio
–Determined after concrete was subjected to high temperature (**54-47**) Apr. 1958 ... 857
–Lightweight aggregate structural concrete (**54-16**) Oct. 1957 ... 299
Polivka, J. J.—Disc. Failures of concrete structures (**54-25**) June 1958 ... 1197
Post-tensioning—Multibeam bridges (**54-28**) Dec. 1957 ... 505
Precast elements
–Thin-section — Allowable stresses — Recommended practice (**54-51**) May 1958 ... 921
–Thin-section—Erection—Recommended practice (**54-51**) May 1958 ... 921
–Thin-section — Fabrication — Recommended practice (**54-41**) May 1958 ... 921
–Thin-section—Materials—Recommended practice (**54-41**) May 1958 ... 921
Precast floor and roof units
–Curing and handling—Recommended practice (**54-24**) Dec. 1957 ... 441
–Design—Recommended practice (**54-24**) Dec. 1957 ... 441
–Holes and openings—Recommended practice (**54-24**) Dec. 1957 ... 441

–Installation—Recommended practice (**54-24**) Dec. 1957 441
–Manufacture—Recommended practice (**54-24**) Dec. 1957 441
–Materials—Recommended practice (**54-24**) Dec. 1957 441
–Tests—Recommended practice (**54-24**) Dec. 1957 441
Precast grills—Architectural treatment for building (**54-52**) May 1958 929
Precast reinforced concrete slab bridges with stiffened edges (54-63)
–Andrew Gallia, June 1958 1083
–Disc. D. V. Reddy and Author, Part 2, Dec. 1958 1427
Precast slab bridges—Design (**54-63**) June 1958 1083
Prepacked concrete
–High density (**54-56**) May 1958 965
–Marine structures (**54-45**) Apr. 1958 841
President's address—Walter H. Price (**54-44**) Apr. 1958 825
Prestress loss—Effect of creep (**54-41**) Mar. 1958 739
Prestressed beams
–Creep (**54-49**) Apr. 1958 879
–Expanded shale and conventional concrete—Fatigue and static tests (**54-10**) Aug. 1957 141
–Full size for bridge—Tests to failure (**54-57**) May 1958 979
Prestressed bridges—Multibeam type (**54-28**) Dec. 1957 505
Prestressed concrete
–Lightweight—Folded plate roof—Design and construction (**54-8**) Aug. 1957 115
–Loss of prestress due to creep (**54-66**) June 1958. 1111
–Ultimate strength—Discussion (**54-CB**) Nov. 1957 423
Prestressed concrete recommendations
–Allowable stresses (**54-30**) Jan. 1958 545
–Bond and anchorage (**54-30**) Jan. 1958 545
–Composite construction (**54-30**) Jan. 1958 545
–Construction (**54-30**) Jan. 1958 545
–Design (**54-30**) Jan. 1958 545
–Grout (**54-30**) Jan. 1958 545
–Load factors (**54-30**) Jan. 1958 545
–Materials (**54-30**) Jan. 1958 545
–Placing and stressing steel (**54-30**) Jan. 1958 545
–Prestress loss (**54-30**) Jan. 1958 545
–Shear (**54-30**) Jan. 1958 545
Prestressed foundations—Press—Strengthened by post-tensioning (**54-55**) May 1958 961
Prestressing—Recommendations for applying prestress (**54-30**) Jan. 1958 545
Prestressing steel—Recommended types, location, properties (**54-30**) Jan. 1958 545
Price, Walter H.—ACI's decade of progress (**54-44**) Apr. 1958 825
Proportioning
–Air-entrained concrete (**54-34**) Feb. 1958 633
–Effect on creep (**54-49**) Apr. 1958 879
–Effect on failures (**54-25**) Dec. 1957 449
–Lightweight aggregate concrete (**54-29**) Dec. 1957 527
–Lightweight aggregate concrete for structural uses (**54-16**) Oct. 1957 299
–Lightweight structural concrete (**54-33**) Jan. 1958 605
–Lightweight structural concrete—For uniformity (**54-61**) June 1958 1059
–Mixtures using fly ash—To have same properties as straight portland cement concrete (**54-64**) June 1958 1093
–Winter concreting in Europe (**54-19**) Nov. 1957 369
Proportioning concrete mixtures using fly ash (54-64) C. W. Lovewell and George W. Washa, June 1958 1093
Proportioning, control, and field practice for lightweight concrete (54-29)
–Truman R. Jones, Jr. and Henson K. Stephenson, Dec. 1957 527
–Disc. E. L. Howard, June 1958 1215
Proportions—Effect on strength (**54-50**) Apr. 1958 897
Proposed revision of ACI standard 711-53: minimum standard requirements for precast concrete floor and roof units (54-24)
–Committee 711, Dec. 1957 441
–Disc. Michael Alexander, P. O. Freeman, and Committee, June 1958 1191
Proposed test procedure to determine relative bond value of reinforcing bars (54-6) Committee 208, Aug. 1957 89
Puddling—High density concrete (**54-56**) May 1958 965

Q

Quality control—Field concrete test evaluation —Recommended practice (**54-1**) July 1957 1

R

Radiation shielding—High-density concrete—Properties, placement, materials and cost (**54-56**) May 1958 965
Recommended practice for evaluation of compression test results of field concrete (ACI 214-57) (54-1)
–Committee 214, July 1957 1
–Disc. Celso A. Carbonell, Harry H. Mitchell, and Committee, Mar. 1958 775
Rectangular members—Unsymmetrical bending—Ultimate strength design (**54-36**) Feb. 1958 657
Reddy, D. V.
–Disc. Concept of elastic parameters (**54-58**) Part 2, Dec. 1958 1415

–Flat—Analysis—General method (**54-3**) July 1957 31
–Flat—Ultimate shear strength—Without shear reinforcement (**54-15**) Oct. 1957 265
–Isotropic and homogeneous—Design method (**54-21**) Nov. 1957 397
–Precast—Used side by side to form bridge (**54-63**) June 1958 1083
–Shrinkage—Possible cause of apparent movement of masonry backup wall (**54-P&P**) Feb. 1958 707
–Simply supported—Creep (**54-49**) Apr. 1958 879
–Warehouse floors on ground—Design (**54-7**) Aug. 1957 105

Slag
–Chemical data (**54-13**) Sept. 1957 205
–Expanded—Tested as aggregate for structural concrete (**54-16**) Oct. 1957 299

Slag cement
–Properties and chemical data (**54-13**) Sept. 1957 205
–Specifications (**54-13**) Sept. 1957 205

Slag cement concrete
–Bleeding (**54-13**) Sept. 1957 205
–Bond to and corrosion of reinforcing (**54-13**) Sept. 1957 205
–Effects of variable curing (**54-13**) Sept. 1957 205
–Resistance to accelerated freezing and thawing and field exposure (**54-13**) Sept. 1957 205
–Shrinkage (**54-13**) Sept. 1957 205
–Subsidence at early ages (**54-13**) Sept. 1957 205

Slag concrete—Abrasion resistance (**54-13**) Sept. 1957 205

Slate—Expanded—Tested as aggregate for structural concrete (**54-16**) Oct. 1957 299

Slip forms
–Construction of (**54-43**) Mar. 1958 767
–Ten-story apartment building (**54-43**) Mar. 1958 767

Smothers, W. J.—Effect of tobermorite on the mechanical strength of autoclaved portland cement-silica mixtures (**54-9**) Aug. 1957 127

Some effects of carbon dioxide on mortars and concrete—Discussion (54-CB) A. Steopoe, May 1958 ... 1012
Some physical properties of concrete at high temperatures (54-47) Robert Philleo, Apr. 1958 ... 857
Sonic testing—Relationship of ultrasonic pulse velocity and compressive tests **(54-37)** Feb. 1958 ... 675
Soretz, Stefan—Disc. Under-reinforced concrete beams under long-term loads **(54-2)** Mar. 1958 ... 779
South Carolina test road—Long-time study **(54-59)** June 1958 ... 1017
Spacing of spliced bars in beams (54-38)
–S. J. Chamberlin, Feb. 1958 ... 689
–Disc. D. Watstein, Part 2, Sept. 1958 ... 1265
Spalling—Promoted by elevated temperatures for surface removal **(54-32)** Jan. 1958 ... 591
Specific gravity factor—Use in proportioning lightweight structural concrete **(54-33)** Jan. 1958 ... 605
Specific surface
–Aggregates—Effect on density **(54-50)** Apr. 1958 ... 897
–Aggregates—Effect on modulus of rupture **(54-50)** Apr. 1958 ... 897
–Aggregates—Related to compressive and flexural strength **(54-50)** Apr. 1958 ... 897
Specific surface of aggregates related to compressive and flexural strength of concrete (54-50)
–B. G. Singh, Apr. 1958 ... 897
–Disc. D. McKay and P. Johnson, N. R. Srinivasan, C. F. Zeitsman, and Author, Part 2, Dec. 1958 ... 1373
Spindel, M.—Disc. Use of concrete in marine environments **(54-46)** Part 2, Dec. 1958 ... 1309
Splices
–Lapped—Effect of length on load carrying capacity of beams **(54-38)** ... 689
–Lapped—Spacing in beams—Effect on bond **(54-38)** Feb. 1958 ... 689
–Lapped in beams—Stirrup requirements **(54-CB)** Nov. 1957 ... 421
–Welded steel for column reinforcement **(54-52)** May 1958 ... 929
Splitting—Beams—Prevention **(54-CB)** Nov. 1957 ... 421
Srinivasan, N. R.—Disc. Specific surface of aggregates related to compressive and flexural strength of concrete **(54-50)** Part 2, Dec. 1958 ... 13
Stairway—Circular—Analysis **(54-CB)** Feb. 1958 ... 6-9
Static and fatigue strength in shear of beams with tensile reinforcement (54-60)
–Tien S. Chang and Clyde E. Kesler, June 1958 ... 1033
–Disc. By Geoffrey Brock and Authors, Part 2, Dec. 1958 ... 1425
Steam curing—Effect on strength of cement-silica mixtures—Effect of tobermorite **(54-9)** Aug. 1957 ... 127
Steel
–Hard grade versus intermediate when subjected to impact loading **(54-14)** Sept. 1957 ... 233
–High strength, reduces column sizes **(54-52)** May 1958 ... 929
Steopoe, A.—Some effects of carbon dioxide on mortars and concrete—Discussion **(54-CB)** May 1958 ... 1012
Stephens, Jack E.—Under-reinforced concrete beams under long-term loads **(54-2)** July 1957 ... 21
Stephenson, Henson K.—Proportioning, control, and field practice for lightweight concrete **(54-29)** Dec. 1957 ... 527
Stover, H. E.—Use of concrete in marine environments **(54-45)** Apr. 1958 ... 841
Strand steel—Use in prestressed expanded shale and conventional concrete **(54-10)** Aug. 1957 ... 141
Strength
–Effect of mixing and curing temperature on **(54-62)** June 1958 ... 1063
–Effect of proportions on **(54-50)** Apr. 1958 ... 897
–Mechanical—Autoclaved cement-silica mixtures—Effect of tobermorite **(54-9)** Aug. 1957 ... 127
–Related to cement performance **(54-27)** Dec. 1957 ... 481
–Specifications—Guide **(54-1)** July 1957 ... 1
Strength control—Field concrete test evaluation—Recommended practice **(54-1)** July 1957 ... 1
Strength of concrete under combined tensile and compressive stress (54-45)
–Douglas McHenry and Joseph Karni, Apr. 1958 ... 829
–Disc. Louis P. Brice, A. Coûard, K. W. Johansen, Gonzalo de Navacerrada y Farias, and Authors, Part 2, Dec. 1958 ... 1301
Stresses
–Allowable—Prestressed concrete recommendations **(54-30)** Jan. 1958 ... 545
–Allowable—Thin-section precast elements—Recommended practice **(54-51)** May 1958 ... 921
–Combined tensile and compressive—Strength test **(54-45)** Apr. 1958 ... 829
–Secondary—Effect on failures **(54-25)** Dec. 1957 ... 449
–Variable—Creep computation **(54-41)** Mar. 1958 ... 739
Structural grade steel—Compared with hard grade under impulse load **(54-14)** Sept. 1957 ... 233
Study of concrete pipe in service (54-35)
–W. J. McCoy, R. J. Sweitzer, and M. E. Flentje, Feb. 1958 ... 647
–Disc. Bailey Tremper, Part 2, Sept. 1958 ... 1251
Sulfate attack—Marine structures **(54-45)** Apr. 1958 ... 841
Sulfate resistance—Portland slag cement **(54-13)** Sept. 1957 ... 205
Surface appearance—Effect of revibration **(54-39)** Mar. 1958 ... 721
Surface removal—Relation of elevated temperatures **(54-32)** Jan. 1958 ... 591
Sustained load—Effect on compressive strength **(54-66)** June 1958 ... 1111
Sweitzer, R. J.—Study of concrete pipe in service **(54-35)** Feb. 1958 ... 647
Swenson, E. G.—Winter concreting trends in Europe **(54-19)** Nov. 1957 ... 369

T

Temperature
–Effect on air-entraining agent requirements **(54-62)** June 1958 ... 1063
–Effect on failures **(54-25)** Dec. 1957 ... 449
–Effect on slump and water requirements **(54-62)** June 1958 ... 1063
–Effect on stress in continuous frames **(54-23)** Nov. 1957 ... 415
–Effect on variation of concrete and mortar properties **(54-20)** Nov. 1957 ... 385
–Elevated—Related to concrete surface removal **(54-32)** Jan. 1958 ... 591
–High—Effect on thermal expansion, density, and dynamic modulus of elasticity **(54-47)** Apr. 1958 ... 857
–High—Weight loss due to **(54-47)** Apr. 1948 ... 857
–Mixing and curing—Effect on concrete strength **(54-62)** June 1958 ... 1063
Temperature stresses in continuous frames (54-23) Sam Hassid, Nov. 1957 ... 415
Tensile strength—Variation with temperature **(54-20)** Nov. 1957 ... 385
Tensile stress—Combined with compression—Strength test **(54-45)** Apr. 1958 ... 829
Tentative recommendations for prestressed concrete (54-30)
–Committee 323, Jan. 1958 ... 545
–Disc. P. W. Abeles, L. D. Boswell, Ross H. Bryan, Michael Chi, A. W. Coutris, Charles J. Fox, G. F. Janssonius, T. Y. Lin, Le Grande P. Marchant, and D. J. Oswald, Part 2, Sept. 1958 ... 1217
–Disc. closure by Committee, Part 2, Dec. 1958 ... 1291
Tentative recommendations for thin-section reinforced precast concrete construction (54-51)
–Committee 324, May 1958 ... 921
–Disc. Edward A. Abdun-Nur, Frank G. Erskine, Cedric Willson and Rudolph C. Valore, Jr., and Committee, Part 2, Dec. 1958 ... 1383
Terminology—Word compounds using all or part of "concrete" **(54-CB)** Aug. 1957 ... 166
Test specimens—Compression—Recommended practice **(54-1)** July 1957 ... 1
Tests of full-sized prestressed concrete bridge beams (54-57) Inge Lyse, May 1958 ... 979

Thermal conductivity—Lightweight structural concrete (**54-33**) Jan. 1958 ... 605
Thermal expansion—Effect of high temperatures (**54-47**) Apr. 1958 ... 857
Thomas, H. E.—Disc. Use of concrete in marine environments (**54-46**) Part 2, Dec. 1958 ... 1309
Tobermorite—Effect on mechanical strength of autoclaved portland cement-silica mixtures (**54-9**) Aug. 1957 ... 127
Topping pavements with calcium aluminate cement concrete (54-CB) W. C. Hansen and W. W. Brandvold, May 1958 ... 1009
Torque—Elastic and plastic equations for (**54-18**) Oct. 1957 ... 341
Torsion tests—Rectangular beams (**54-18**) Oct. 1957 ... 341
Transverse strength of concrete block walls (54-54)
–F. W. Cox and J. L. Ennenga, May 1958 ... 951
–Disc. Robert D. Dikkers and Authors Part 2, Dec. 1958 ... 1403
Tremie concrete—Marine structures (**54-45**) Apr. 1958 ... 841
Tremper, Bailey—Disc. Study of concrete pipe in service (**54-35**) Part 2, Sept. 1958 ... 1251
Tuthill, Lewis H.—Disc. Effects of revibrating concrete (**54-39**) Part 2, Sept. 1958 ... 1267
Two-way slabs—Design methods criticized (**54-21**) Nov. 1957 ... 397

U

Ultimate flexural strength of prestressed and conventionally reinforced concrete beams—discussion (54-CB) K. Hajnal Kónyi, Nov. 1957 ... 423
Ultimate resisting moment of beams with compression reinforcement (54-42)
–Eugene Guillard, Mar. 1958 ... 759
–Disc. Edward Cohen, Henry J. Cowan, Jaime de las Casas, Marvin A. Larson, A. Zaslavsky, and Author, Part 2, Sept. 1958 ... 1281
Ultimate shear strength—Flat slabs, footings, beams, and frame members without shear reinforcement (**54-15**) Oct. 1957 ... 265
Ultimate shear strength of reinforced concrete flat slabs, footings, beams, and frame members without shear reinforcement (54-15)
–Charles S. Whitney, Oct. 1957 ... 265
–Disc. S. Constantinescu-Cătunesti, Jaime de las Casas, W. T. Marshall, and Author, June 1958 ... 1157
Ultimate strength
–Prestressed and conventionally reinforced concrete beams (**54-CB**) Nov. 1957 ... 423
–Under-reinforced beam—Effect of long-term loading (**54-2**) July 1957 ... 21
Ultimate strength design
–Beams with compression reinforcement—Proposed revision of assumptions (**54-42**) Mar. 1958 ... 759
–Code changes in 1956 (**54-11**) Sept. 1957 ... 185
–Columns controlled by tension—Design charts (**54-26**) Dec. 1957 ... 471
–Explanatory notes on Building Code appendix requirements (**54-12**) Sept. 1957 ... 197
–Rectangular members subject to unsymmetrical bending (**54-36**) Feb. 1958 ... 657
Ultimate strength design charts for columns controlled by tension (54-26)
–Tung Au, Dec. 1957 ... 471
–Disc. Jack Moyse and Author, June 1958 ... 1213
Ultimate strength design of rectangular concrete members subject to unsymmetrical bending (54-36)
–Tung Au, Feb. 1958 ... 657
–Disc. Kuang-Han Chu and A. Pabarcius, S. Constantinescu-Cătunesti, and Author, Part 2, Sept. 1958 ... 1253
Ultimate torsional properties of rectangular reinforced concrete beams (54-18)
–G. C. Ernst, Oct. 1957 ... 341
–Disc. Fritz Leonhardt, W. T. Marshall, and Author, June 1958 ... 1173
Ultrasonic pulse velocity—Related to compressive strength of columns (**54-37**) Feb. 1958 ... 675
Under-reinforced concrete beams under long-term loads (54-2)
–Herbert A. Sawyer, Jr., and Jack E. Stephens, July 1957 ... 21
–Disc. Stefan Soretz and Authors, Mar. 1958 ... 779
Uniform structural lightweight aggregate concrete through careful proportioning and control (54-61) Paul J. Fluss, June 1958 ... 1059
Uniformity of concrete—Effect of revibration (**54-39**) Mar. 1958 ... 721
Use of concrete in marine environment (54-45)
–C. M. Wakeman, E. V. Dockweiler, H. E. Stover, and L. L. Whiteneck, Apr. 1958 ... 841
–Disc. L. S. Brown, Herbert K. Cook, Paul J. Fluss and Sydney S. Gorman, Homer M. Hadley, Wilson C. Hanna, W. P. Kinneman, Shu-t'ien Li, M. Spindel, H. E. Thomas, and Authors, Part 2, Dec. 1958 ... 1301

CONTENTS—Proceedings V. 54, 1957-58

From July 1957 JOURNAL

54-1 **Recommended Practice for Evaluation of Compression Test Results of Field Concrete (ACI 214-57)** 1
By ACI Committee 214
Discussion (March 1958 Journal) 775

54-2 **Under-Reinforced Concrete Beams Under Long-Terms Loads** 21
By Herbert A. Sawyer, Jr. and Jack E. Stephens
Discussion (March 1958 Journal) 779

54-3 **General Method for Analysis of Flat Slabs and Plates** 31
By John F. Brotchie
Discussion (March 1958 Journal) 787

54-4 **Effect of a Waterproof Coating on Concrete Durability** 51
By Warrington G. Mitchell
Discussion (March 1958 Journal) 797

54-5 **Control Joints Regulate Effects of Volume Change in Concrete Masonry** 59
By G. A. Mansfield, C. A. Sirrine, and Benjamin Wilk

Current Reviews 71

From August 1957 JOURNAL

54-6 **Proposed Test Procedure to Determine Relative Bond Value of Reinforcing Bars** .. 89
By ACI Committee 208

54-7 **Design of Concrete Floors on Ground for Warehouse Loadings** 105
By Paul F. Rice
Discussion (March 1958 Journal) 799

54-8 **Multispan Prestressed Folded Plate Roof for Langendorf Bakery** 115
By John J. Driskell

54-9 **Effect of Tobermorite on the Mechanical Strength of Autoclaved Portland Cement-Silica Mixtures** 127
By L. Dean Sanders and W. J. Smothers

54-10 **Fatigue and Static Tests of Steel Strand Prestressed Beams of Expanded Shale Concrete and Conventional Concrete** 141
By Gene M. Nordby and William J. Venuti
Discussion (March 1958 Journal) 803

Concrete Briefs 161
Calibration and Use of Impact Test Hammer by N. G. Zoldners 161
Concrete's Etymological Offspring 166
Problems and Practices 167

Current Reviews 169

From September 1957 JOURNAL

54-11 **Review of Changes in the ACI Building Code Requirements for Reinforced Concrete** 185
By Frank Kerekes
Discussion (March 1958 Journal) 809

54-12 **Explanatory Notes on Appendix (Ultimate Strength Design) to "Building Code Requirements for Reinforced Concrete (ACI 318-56)"** 197
By ACI Committee 318

54-13 **Laboratory Tests of Portland Blast-Furnace Slag Cements** 205
By Bryant Mather

54-14 **Destructive Impulse Loading of Reinforced Concrete Beams** 233
By F. T. Mavis and M. J. Greaves
Discussion (March 1958 Journal) 811

Current Reviews 253

From October 1957 JOURNAL

54-15 **Ultimate Shear Strength of Reinforced Concrete Flat Slabs, Footings, Beams, and Frame Members Without Shear Reinforcement** 265
By Charles S. Whitney
Discussion (June 1958 Journal) 1157

54-16 **Lightweight-Aggregate Concrete for Structural Use** 299
By J. J. Shideler
Discussion (June 1958 Journal) 1165

54-17 **Construction of the Dallas Memorial Auditorium** 329
By Jack E. Roselund
Discussion (June 1958 Journal) 1169

54-18 **Ultimate Torsional Properties of Rectangular Reinforced Concrete Beams** 341
By G. C. Ernst
Discussion (June 1958 Journal) 1173

Concrete Briefs 357
Inspection and Control of Haydite Concrete by E. L. Howard and M. B. Jones 357
Problems and Practices 359

Current Reviews 363

From November 1957 JOURNAL

54-19 **Winter Concreting Trends in Europe** 369
By E. G. Swenson

54-20 **Variation of Mortar and Concrete Properties with Temperature** 385
By J. C. Saemann and G. W. Washa

54-21 **A Critical Look at Slab Design Methods** 397
By K. E. McKee and E. I. Fiesenheiser
Discussion (June 1958 Journal) 1177

54-22 **Bearing Capacity of Concrete** 405
By William Shelson
Discussion (June 1958 Journal) 1183

54-23 **Temperature Stresses in Continuous Frames** 415
By Sam Hassid

Concrete Briefs 421
Lapped Splices in Reinforced Concrete Beams—Discussion by K. Hajnal-Konyi 421
Expanded Shale or Clay Concrete by F. A. Blakey and R. D. Hill 422
Ultimate Flexural Strength of Prestressed and Conventionally Reinforced Concrete Beams —Discussion by K. Hajnal-Konyi 423

Current Reviews 425

From December 1957 JOURNAL

54-24 **Proposed Revision of ACI Standard 711-53: Minimum Standard Requirements for Precast Concrete Floor and Roof Units** 441
By ACI Committee 711
Discussion (June 1958 Journal) 1191

54-25 **Failures of Concrete Structures** 449
By Jacob Feld
Discussion (June 1958 Journal) 1197

54-26 **Ultimate Strength Design Charts for Columns Controlled by Tension** 471
By Tung Au
Discussion (June 1958 Journal) 1213

54-27 **Long-Time Study of Cement Performance in Concrete. Chapter 10—Progress Report on Strength and Elastic Properties of Concrete** 481
By Paul Klieger

54-28 **Investigation of Multibeam Bridges** 505
By Rene E. Walther

54-29 **Proportioning, Control, and Field Practice for Lightweight Concrete** 527
By Truman R. Jones, Jr. and Henson K. Stephenson
Discussion (June 1958 Journal) 1215

Current Reviews 537

From January 1958 JOURNAL

54-30 **Tentative Recommendations for Prestressed Concrete** 545
By ACI-ASCE Committee 323
Discussion (Part 2, September 1958 Journal) 1217
Closure to Discussion (Part 2, December 1958 Journal) 1291

Discussion (Part 2, September 1958 Journal) 1253

54-37 **Compressive Strength and Ultrasonic Pulse Velocity Relationships for Concrete in Columns** 675
By M. F. KAPLAN
Discussion (Part 2, September 1958 JOURNAL) 1259

54-38 **Spacing of Spliced Bars in Beams** 689
By S. J. CHAMBERLIN
Discussion (Part 2, September 1958 JOURNAL) 1265

Concrete Briefs 699
Circular Stairway for University City by MARTIN SCHULZ 699
Locating Metal Embedded in Concrete by W. MARKS JAILLITE 705
Problems and Practices 707

Current Reviews 709

From March 1958 JOURNAL

54-39 **Effects of Revibrating Concrete** 721
By C. A. VOLLICK
Discussion (Part 2, September 1958 JOURNAL) 1267

54-40 **Concrete for Sewage Works** 733
By E. C. WENGER
Discussion (Part 2, September 1958 JOURNAL) 1273

54-41 **Creep of Concrete under Variable Stress** 739
By A. D. ROSS
Discussion (Part 2, September 1958 JOURNAL) 1279

54-42 **Ultimate Resisting Moment of Beams with Compression Reinforcement** 759
By EUGENE GUILLARD
Discussion (Part 2, September 1958 JOURNAL) 1281

54-43 **First Slip-Formed Apartment Building in the United States** 767
By JOHN H. DOGGETT

Current Reviews 773

Discussion (Listed above with papers to which it pertains) 775

From April 1958 JOURNAL

54-44 **ACI's Decade of Progress** 825
By WALTER H. PRICE

54-45 **Strength of Concrete under Combined Tensile and Compressive Stress** 829
By DOUGLAS MCHENRY and JOSEPH KARNI
Discussion (Part 2, December 1958 JOURNAL) 1301

54-46 **Use of Concrete in Marine Environments** 841
By C. M. WAKEMAN, E. V. DOCKWEILER, H. E. STOVER, and L. L. WHITENECK
Discussion (Part 2, December 1958 JOURNAL) 1309

54-47 **Some Physical Properties of Concrete at High Temperatures** 857
By ROBERT PHILLEO

54-48 **Flexural Cracks in Reinforced Concrete Beams** 865
By MICHAEL CHI and ARTHUR F. KIRSTEIN
Discussion (Part 2, December 1958 JOURNAL) 1347

54-49 **Creep of Plain and Reinforced Concrete** 879
By P. G. FLUCK and G. W. WASHA

54-50 **Specific Surface of Aggregates Related to Compressive and Flexural Strength of Concrete** 897
By B. G. Singh
Discussion (Part 2, December 1958 Journal) 1373

Current Reviews 909

From May 1958 JOURNAL

54-51 **Tentative Recommendations for Thin-Section Reinforced Precast Concrete Construction** 921
By ACI Committee 324
Discussion (Part 2, December 1958 Journal) 1383

54-52 **High Strength Steel and Concrete Result in Minimum Column Sizes** 929
By Frank W. Chappell
Discussion (Part 2, December 1958 Journal) 1389

54-53 **Warping of Reinforced Concrete Due to Shrinkage** 939
By Alfred L. Miller
Discussion (Part 2, December 1958 Journal) 1393

54-54 **Transverse Strength of Concrete Block Walls** 951
By F. W. Cox and J. L. Ennenga
Discussion (Part 2, December 1958 Journal) 1403

54-55 **Reinforcement of Press Foundations by Post-Tensioning** 961
By Fritz Kramrisch

54-56 **High-Density Concrete for Shielding Atomic Energy Plants** 965
By Harold S. Davis
Discussion (Part 2, December 1958 Journal) 1411

54-57 **Tests of Full-Sized Prestressed Concrete Bridge Beams** 979
By Inge Lyse

54-58 **Concept of Elastic Parameters** 987
By Valerian Leontovich
Discussion (Part 2, December 1958 Journal) 1415

Concrete Briefs 1009
Topping Pavements with Calcium Aluminate Cement Concrete by W. C. Hansen and W. W. Brandvold 1009
Some Effects of Carbon Dioxide on Mortars and Concrete—Discussion by A. Steopoe 1012
Problems and Practices 1012

Current Reviews 1013

From June 1958 JOURNAL

54-59 **Long-Time Study of Cement Performance in Concrete. Chapter 11—Report on the Condition of Three Test Pavements After 15 Years of Service** 1017
By Frank H. Jackson

54-60 **Static and Fatigue Strength in Shear of Beams with Tensile Reinforcement** 1033
By Tien S. Chang and Clyde E. Kesler
Discussion (Part 2, December 1958 Journal) 1425

54-61 **Uniform Structural Lightweight Aggregate Concrete Through Careful Proportioning and Control** 1059
By Paul J. Fluss

54-62 **Effect of Mixing and Curing Temperature on Concrete Strength** 1063
By Paul Klieger

54-63 **Precast Reinforced Concrete Slab Bridges with Stiffened Edges** 1083
By Andrew Gallia
Discussion (Part 2, December 1958 Journal) 1427

54-64 **Proportioning Concrete Mixtures Using Fly Ash** 1093
By C. E. Lovewell and George W. Washa

54-65 **Military Personnel Records Center Built Without Expansion Joints** 1103
By Earl B. Cohn and W. A. Wall
Discussion (Part 2, December 1958 Journal) 1431

54-66 **Creep and Creep Recovery of Concrete under High Compressive Stress** 1111
By A. M. Freudenthal and Frederic Roll
Discussion (Part 2, December 1958 Journal) 1433

Concrete Briefs 1143
Effect of Column Width on Continuous Beam Moment by Henri C. Hepp and Thor Germundsson 1143
Permissible Concrete Shear Stresses of the 1957 British Code of Practice by C. B. Wilby ..1146

Current Reviews 1149

Discussion (Listed above with papers to which it pertains) 1157

From Part 2, September 1958 JOURNAL

Discussion (Listed above with papers to which it pertains) 1217

From Part 2, December 1958 JOURNAL

Discussion (Listed above with papers to which it pertains) 1291
